SUMMARY

Full Stack Software Engineer with 5+ years of experience building scalable, API-driven web applications and AI-driven systems. Expert in architecting high-performance applications using Laravel, Python (Fast Api), React, Vue.js, and Node.js, with a proven track record of modernizing legacy systems into scalable, microservices-based architectures. Experienced in building enterprise SaaS platforms, designing AI microservices, and leveraging vector databases (Weaviate, Pinecone, Milvus) for RAG pipelines and intelligent agents. Strong background in cloud infrastructure (AWS, Docker, CI/CD) and distributed systems.

SKILLS

- Front-End:** React.js, JavaScript, TypeScript, Redux, Context API, Vue.js, HTML5, CSS3, Tailwind CSS, Bootstrap Vue, jQuery, Responsive UI, Hybrid Mobile App Development
- Back-End:** PHP, Laravel, Core PHP, REST APIs, Livewire, Node.js, Microservices, Python
- Databases:** MySQL, PostgreSQL, Redis, Mongo Db
 - AI :** Rag, Ollama, LLM, open ai, vector databases, embeddings, Model Training
- DevOps & Cloud:** AWS, Docker, CI/CD Pipelines, Git, GitHub, GitLab, Linux Server Management
- Testing & Tools:** Postman, API Testing, PHPUnit, Jest, Integration Testing, Unit Testing, Debugging, Performance Optimization, Jira

EXPERIENCE

- Senior Full Stack Developer**
Syanax PTV limited

03/2024 – Present

 - Worked on modernization of a large-scale golf course management platform originally built in Core PHP.
 - Contributed to migration of the system to Laravel and Vue.js to improve scalability, maintainability and performance.
 - Developed and maintained features related to employee management, task tracking, weather forecasting and mowing operations and automated it using Ai and rag.
 - Worked with Redis, RabbitMQ, Socket.io and microservices architecture.
 - Collaborated on scalable backend services and modern JavaScript ecosystems including Node.js and MERN-related technologies.
 - Collaborated with frontend and backend teams in agile development workflows.
 - Helped deliver a product later acquired in a high-value business deal.
- Senior PHP Laravel Developer**
IPLEX

10/2023 – 03/2024

 - Developed and maintained Laravel-based web applications in a collaborative team environment.
 - Built reusable backend modules and API integrations.
 - Improved application functionality and user experience through clean and maintainable code.
 - Contributed to modern frontend and backend workflows involving React.js, Node.js and API-driven architectures.
 - Worked closely with team members on real-time projects and feature enhancements.
- PHP Laravel Developer**
Rapidev tech

04/2020 – 10/2023

 - Developed full-stack web applications using Laravel and modern frontend technologies.
 - Built APIs for mobile applications and integrated third-party services.
 - Worked on scalable backend systems, REST APIs and JavaScript-based application architectures including MERN ecosystem exposure.
 - Worked on healthcare, payment and real-estate management systems.
 - Collaborated with multiple teams to deliver scalable and client-focused solutions.

PROJECTS

ASB Task Tracker

A large-scale golf course management and workforce tracking platform designed to manage daily operations, employee activities, weather forecasting, mowing schedules and task monitoring.

- Developed and maintained full-stack modules using Laravel and Vue.js and automated it using Ai.
- Implemented real-time communication features using Socket.io.
- Integrated Mapbox for location-based task visualization and tracking.
- Worked with Redis and RabbitMQ for queue management and scalable background processing.
- Collaborated within a microservices-based architecture to improve system performance and maintainability.
- Contributed to modernization of a legacy Core PHP system into a scalable Laravel + Vue.js platform.

Technologies: Laravel, Vue.js, Redis, RabbitMQ, Socket.io, Node.js, Mapbox

Syanex Official Website

Developed and launched the official company website as a Full Stack Developer with responsive frontend design and scalable backend architecture.

- Built responsive frontend interfaces using Vue.js, HTML5, CSS3, and Bootstrap.
- Developed backend functionalities and API integrations using Laravel.
- Integrated SendGrid for email communication services.
- Implemented Google reCAPTCHA for security and spam prevention.
- Worked on authentication and API security using Laravel Sanctum.

Technologies: Laravel, Vue.js, Bootstrap, MySQL, Sanctum, SendGrid, REST APIs

YooHoo Homes

A modern real-estate web and mobile platform developed for multiple user roles including Admin, Seller, Agency, and Buyer.

- Developed advanced property search functionality for both web and mobile applications.
- Built REST APIs for mobile app integration.
- Developed complete blog management functionality.
- Integrated Google Maps for property location and map-based features.
- Implemented role-based authentication and secure access management.
- Developed testimonial and real-estate project modules.

Technologies: Laravel, PHP, MySQL, Google Maps API, Bootstrap, REST APIs

Payment CMS

An organizational payment management platform developed for handling company payment services and transaction processing.

- Integrated Stripe payment APIs for secure online transactions.
- Implemented Stripe 3D Secure authentication.
- Developed refund payment functionality.
- Built affiliate user payment features and payment record management.
- Developed backend modules for transaction tracking and reporting.

Technologies: Laravel, PHP, Stripe API, MySQL, Bootstrap, jQuery

EDUCATION

Bachelor of Software Engineering

08/2019 – 07/2023

University of Sargodha (UOS)

- Major Subjects: Data Structures & Algorithms, Database Systems, Web Development, Object-Oriented Programming, Computer Networks, Mobile & Web Application Development, Artificial Intelligence, Cloud Computing.
